Topic :- Flowchart And
Algorithm

Flowchart:-

A flow chart is a visual representation of the steps in a process.

algorithm or workflow. It uses standardized symbol to represent different to symbol the types or action or steps.

Purpose of Flowchart:-

- To simplify complex process
- To help in understanding analyzing and communications a system a algorithm works.
- To easily find the errors.

Q2:- Algorithm or circle Area and circumference calculate and using proper symbol and connection as shown in explanation.

ANSWER:-

Step 1: Start

Step 2: Input the radius of the circle

Step 3: calculate the area of using formula.

$$\text{Area} = \pi r^2$$

Step 4: calculate the circumference using the formula.

Step 5: Print Area and circumference.

Step 6: Stop
